

7th Asia - Pacific Symposium on Radiochemistry 2022

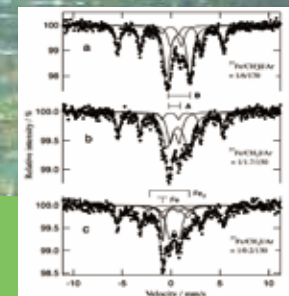

Tentatively Planned during September 11 (Sun) - 16 (Fri) Koriyama, Fukushima, Japan

Scope:

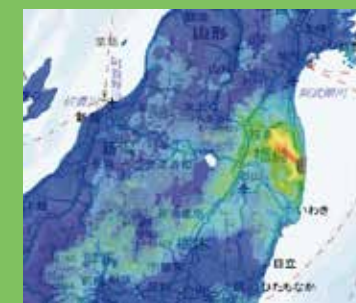

- 11 years from Fukushima NPP accident
- Nihonium (Nh) and trans - U elements
- Nuclear chemistry
- Radioanalytical chemistry
- Actinide chemistry
- Nuclear probe in chemistry
- Activation analysis
- Nuclear forensics
- Radiopharmaceutical chemistry
- Environmental radiochemistry and other related topics

113 Nh nihonium	114 Fl flerovium	115 Mc moscovium	116 Lv livermorium	117 Ts tennessine	118 Og oganeson
------------------------------	-------------------------------	-------------------------------	---------------------------------	--------------------------------	------------------------------

Site tour:

- Visit to Fukushima Dai-ichi Nuclear Power Station

Contact: Yoshio Takahashi (The Univ. of Tokyo)
